

AKAISHI GIFT

SIMPLICITY – DURABILITY – ECORESPONSIBILITY

AKASHI: WHO ARE WE?

The meaning behind our name :

Our brand name AKASHI, paying tribute to the Akashi Kaikyo Bridge, refers to this earthquake-resistant bridge that connects the four main islands of Japan: Honshū, Hokkaidō, Kyūshū, and Shikoku. This encapsulates our intention since 2004: to create lasting and environmentally respectful links between Asia and Europe. It is also the perspective we hold for the promotional item sector, always looking towards the horizon, aiming for a more responsible, sustainable, and equitable future.

The AKASHI brand:

Established in France over 20 years ago, our AKASHI brand offers a complete range of trendy high-tech products, including connected devices, power banks, headphones, earphones, mobile accessories, and speakers.

Our expertise enables us to craft high-quality, functional, and cutting-edge products. We assure trust through factory audits, certifications, and rigorous tests. Our marketing service enhances your experience by creating materials that transform promotional items into brand experiences.

THE CONCEPT DEFINED IN 3 WORDS

SIMPLICITY

Simplicity for us means getting to the core by opting for a clean, ergonomic, and timeless design. AKASHI offers a concise, straightforward, and relevant selection. We limit the number of options, colors, with various quality/price ratios to cater to all your requests and needs.

DURABILITY

Durability is a fundamental concept at AKASHI: we believe we have a role to play in the transition that the promotional item market must undergo. Sustainability is the cornerstone of eco-responsibility, as all our products are designed to meet the strictest French and European standards. You can find our products in over 5000 stores in France and more than 30 airports in Europe.

Our mission is to extend the lifecycle of our products by selecting the finest components, combating planned obsolescence, and promoting rational and responsible consumption.

ECORESPONSIBILITY

Making the choice to be responsible and to consider the carbon footprint of your gift is essential. The AKASHI teams take to heart the need to be transparent, respectful and consistent in our CSR strategy. We seek to innovate in our choice of recycled materials, packaging, transport, energy consumption and the lifecycle of our products.

WE LOVE OUR PLANET

THE "WE LOVE OUR PLANET" PROGRAM

Our participation in the 2050 national low-carbon plan

AKASHI is the brand aiming to redefine High-Tech through a transparent and realistic CSR vision within our "We Love Our Planet" program. Our goal by 2030 is to strive for maximum carbon neutrality in our operations while further enhancing our commitments to uphold our partners' working conditions. Since 2023, nearly all of our products are delivered in recycled and recyclable cardboard packaging, resulting in a 7-fold reduction in our packaging carbon footprint. Our factories undergo regular audits by international

laboratories to ensure a fair distribution of value among all stakeholders (brand, factories, employees).

Together, let's commit to corporate gifts that evoke emotions while safeguarding the future of generations to come. Tailor your gift to a vision of conscious consumption, acknowledging the reality: a sustainable and useful corporate gift ensures a lasting bond of trust with consumers or employees.

WHY PRODUCE IN ASIA?

China has a rich history in electronic product manufacturing, and currently, no other country can offer the same level of skill and quality-to-price ratio in the "Small Electronics Appliances" segment. We bring our own safety, regulatory, and compliance requirements to this expertise, allowing us to provide quality products at a fair price, aligned with our environmental expectations. For several years, we've also been working to reshore production to France and Europe through the "FrenchFab" label, of which we've been partners since 2018. This gradual process underscores our commitment to maximize value creation within national and European territory. Additionally, all our branding, packaging customization, and gift box offerings are produced locally.

Because we must take action today to safeguard tomorrow.

We understand the importance of creating streamlined, timeless products with certified and quality components to ensure their usefulness and performance over time. We are reimagining packaging to protect products using recycled and recyclable FSC cardboard, vegetable-based inks, more eco-responsible supply chains and imports, [...]. We have a comprehensive and systemic approach aimed at minimizing the impact of our activity on the environment, people, and consistently striving for greater sustainability.

Creating responsibly with traceability.

Our products made from recycled materials come from audited and certified supply chains, including the GRS (Global Recycle Standard) audit conducted by independent international laboratories. These audits ensure the origin, traceability, and integrity of the production and supply chain of the materials used in our products.

With every gift, choose to make one for our planet.

Because working towards the sustainability of our business involves offsetting our carbon footprint, we commit to donating a portion of our revenue to replant trees in our forests in Nièvre. This creates natural carbon sinks that will be crucial for a healthy and sustainable future. To support us in this endeavor, we partner with the **ECOTREE** association, dedicated to reforestation and biodiversity.

3 SERVICES

TO ACCOMPANY YOU AND CREATE EMOTION.

Our commitment to creating maximum added value.

All our branding and personalisation of packaging and boxes is carried out in France.

PERSONALISATION

The value of the message is as important as the gift itself. That's why we offer various branding techniques: digital printing, pad printing, laser engraving, doming, as well as individual custom name printing.

DROPSHIPPING

Quick & Easy!

We provide a turnkey service for you. Once the order is placed, it is personalized, packaged, and shipped directly from our warehouse to the recipients' homes.

CREATE AN EXPERIENCE

We offer various packaging options:

A sleeve

A pouch to add one or more products

A box to add one or more product

These packaging choices enhance the overall experience of the gift, making it even more special for the recipients.

THE WORLDS OF AKASHI

The quality of our products is crucial to ensure durability and convey the image of a high-quality gift. This ensures maximum satisfaction with your gift, enhances brand image, and promotes the message of **"conscious consumption with a medium-term vision."**
