# Refinement

We have various technologies at our disposal for finishing and personalising our products with your logo and text, which we use depending on customer requirements, cost-effectiveness or technical conditions.

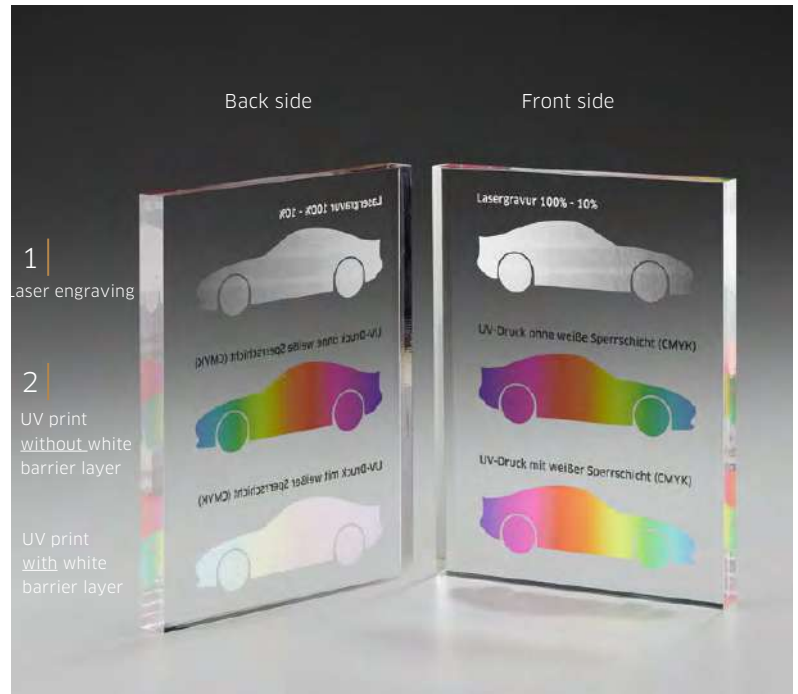

## 1 | Laser engraving

We work with the latest CO<sub>2</sub> laser engraving systems, which are ideal for engraving on acrylic glass, crystal glass and wood. Engravings on acrylic are white, on crystal glass milky grey.

## 2 | UV digital print

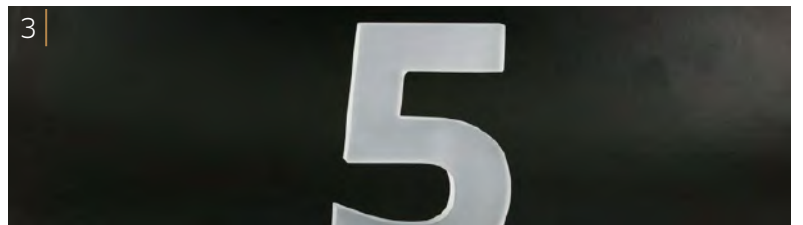

Enhance your products with our high-quality UV printing. Your advantages:

- Coloured logos according to colour specifications
- Fantastic print quality in photo quality
- Print in CMYK colour space
- Personalisation also possible in small quantities

## 3 | Sand blasting

A more elaborate finishing process for crystal glass is sandblasting. The result of the engraving is deeper, more vivid and therefore more exclusive.

## 4 | Screen printing

Of course, we also continue to offer screen printing. Decisive factors for their use are cost-effectiveness, technical conditions or customer requirements, such as special colours like gold, silver or bronze.

## 5 | Varnishing

Particularly when applying colour to the entire surface of multidimensional objects, varnishing produces a great result and is more flexible, faster and cheaper than screen printing.

## 6 | Engraving plates

- Polished solid brass and coloured black. The engraving appears gold-coloured here. Black/gold surface effect.
- Polished solid brass and silver metallic lacquered. Engraving appears gold-coloured. Silver/gold surface effect.
- Brass 0.5 mm or 1.0 mm for UV printing.
- Aluminium 0.5 mm gold, silver, bronze or white for colour printing.

## Metal trophies for printing

A great way to honor individuals! This product features multicolored logos and the possibility of imprinting different inscriptions. Two elements including a solid aluminium plate and an interestingly shaped front element cut from acrylic material are joined by quality silver colored spacers. The acrylic element engraves via laser and the aluminium plate accomodates sublimation printing. A line of trophies with a distinct modern character, lightweight design and ideal for tight budgets.

### Customised Medals

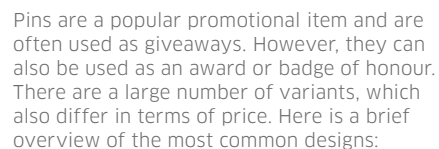

From classic to modern, from monochrome to multicoloured, from one-sided to double-sided motifs. With a wide selection of materials, shapes and styles, you can also have medals produced as customised special designs.

Send us your idea and we will be happy to help you produce truly unique items.

Price on request.  
For cost reasons, we recommend a minimum quantity of 100 pieces.

- **Iron embossing** – favourably priced variant. The recessed surfaces can either be sandblasted or coloured with soft enamel.
- **Copper embossing** – can be gold-plated, silver-plated or nickel-plated to create a valuable pin. Recessed areas can also be sandblasted or coloured with soft enamel.
- **Photo engraving** – brass etched, gold-plated, silver-plated or black nickel-plated. Colour is applied by hand.
- **Offset printing** – is applied directly to brass, aluminium or stainless steel. Colour gradients or photos can be implemented here.
- **Screen printing** – screen printing on metal can be done in Pantone colours. Solid colours only, no colour gradients.
- **Zinc injection moulding** – 3D motifs or free-standing characters can be realised with this method.

# ACRYLIC GLASS

## Individual, aesthetic and colourful

Acrylic glass is ideal for the production of customised awards. Our machinery enables us to cut the material precisely using a laser or CNC portal milling machine. Interesting shapes can be created by combining different acrylic glass layers in various colours and thicknesses. Customised printing or full-surface painting is also possible. Other advantages include an attractive price-performance ratio and the short standard delivery time of around 3 weeks.

# EMBEDDINGS

## Perfect for product presentation

Inclusions in an acrylic block are a popular way of presenting products. Inclusions can be made of paper, clear film or actual products such as coins, computer chips or small castings. A mould is made for the shape of the acrylic block, into which the heated liquid acrylic is poured. The desired inclusions can be moulded in here.

The advantage of the material we use is that it can be laser engraved: the engraving appears milky white. All blocks can be personalised afterwards.

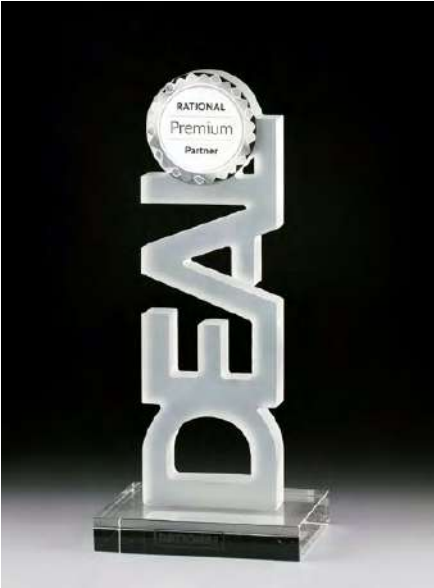

# CRYSTAL GLASS

## Exclusive, high-quality and pure craftsmanship

We only use the highest quality raw materials for your customised crystal glass. The resulting brilliance and light refraction guarantee absolute top class. By adding coloured glass, you can draw on even more possibilities to meet the highest demands. Bevelled edges or bases can also be designed here. Crystal glass also has a presentable weight, which further increases the value of the award. The standard delivery time is around 6 weeks.

# INSIDE ENGRAVING

Unlimited, fascinating and timeless

Engraving your three-dimensional motif inside crystal glass is an interesting and exclusive alternative to external engraving. As a manufacturer, we are not reliant on a few standard shapes, but can offer you almost any special shape. special shapes. We can create the 3D data for you at low cost. There is no minimum order quantity. The standard delivery time is around 6 weeks.

## I Standardised custom-made products

To simplify your selection, we often work with standardised custom-made products. These are glasses with our recommended size and shape. Other sizes are of course also possible!

## I Unlimited customised production

In principle, we can produce almost unlimited special moulds for you. Even for individual items and entirely according to your wishes.

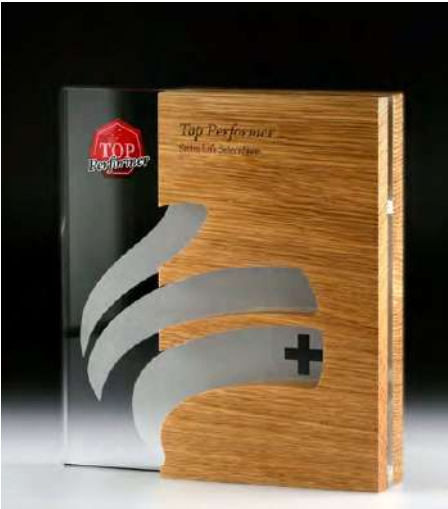

# WOOD

## Modern, sustainable and regional

The unique, natural and warm aesthetics of wood in combination with other materials such as acrylic or metal offer a variety of design options. We work with beech, oak or walnut and use high-quality solid wood. For this reason, we prefer to source our raw materials from sustainable regional forestry. The standard delivery time is around 4-6 weeks.

# ALUMINIUM

## Robust, unique, industrial

Modern industrial designs are particularly effective when using polished aluminium. Different processing options such as water blasting, milling or spark erosion with a surface coating by galvanic anodising or painting are the basis, individual printing according to your wishes is the crowning glory of this production method. production method. Due to the complexity, the standard delivery time starts from 6 weeks.

# DIE-CAST FIGURES

Outstanding, diverse and  
three-dimensional

Who doesn't know them, the awards of the film and music industry. The high-quality processing gives these awards a unique surface finish and is a sign of the highest esteem and absolute uniqueness. Moulds are required for these awards, so a longer delivery time of at least 8 weeks should be taken into account and a four-digit budget should be available.

# CUSTOM COLOUR

Individual, colour-fast, brilliant

Thanks to the use of different printing technologies, we are able to design your trophies according to CI colour specifications. Special colours such as gold, silver or bronze as well as special HKS or Pantone shades can be used for varnishing. Particularly with full-surface colour application, the lacquering impresses with a strong colour-faithful result.
